

HASBI FIRDAUS FAUZUN

Full Stack Web Developer

Tangerang, Banten, Indonesia | [+62 812-9264-5690](tel:+6281292645690) | hasbi.fauzun@gmail.com | [linkedin.com/in/hasbifirdausfauzun](https://www.linkedin.com/in/hasbifirdausfauzun) | <https://porto-hasbi-firdaus-fauzun.vercel.app/>

SUMMARY

Full Stack Web Developer experienced in building responsive web applications with React, Next.js, Tailwind CSS, and Express. Completed an intensive bootcamp and delivered projects with authentication, blogs, and API integrations.

WORK EXPERIENCE

Freelance SEO Copywriter

(July 2024 – December 2024)

- Produced 10–15 SEO-optimized articles per day across various niches (technology, politics, lifestyle, etc.).
- Utilized tools such as **SEMrush** and **Rytr** to generate keyword strategies and optimize article performance.

PROJECT EXPERIENCE

- **Omnifood – Company Profile Website**

Project Description:

Built a responsive multi-page company profile website using React, Next.js, Tailwind CSS, and Backendless. (Situation) The project aimed to replicate a real-world business site with modern full-stack tools. (Task) Responsible for implementing dynamic pages, blog creation, and user authentication. (Action) Developed the UI with Next.js and Tailwind, integrated API-based team data, and used Backendless for data storage and blog management. (Result) Delivered a fully functional and responsive application with login features, dynamic content, and a working blog system.

- **Bankist – Bank App Simulation**

Project Description:

Developed an interactive banking application simulation using HTML, CSS, and JavaScript. (Situation) The project aimed to strengthen understanding of DOM manipulation and event handling. (Task) Built a functional interface with login, money transfers, loan requests, and account closure. (Action) Implemented advanced DOM interactions, timers, and form validations to mimic real banking workflows. (Result) Delivered a smooth, UX-focused simulation that reinforced practical knowledge of JavaScript logic and UI behavior.

- **Nexter – Real Estate Portfolio**

Project Description:

Created a visually rich real estate portfolio website using HTML, SCSS, and CSS Grid. (Situation) The project focused on showcasing luxury homes through a modern and creative layout. (Task) Responsible for designing and implementing a highly visual, grid-based structure to demonstrate CSS Grid proficiency. (Action) Built the layout with semantic HTML5 and advanced CSS Grid techniques, ensuring responsiveness across devices. (Result) Delivered a polished and responsive portfolio site that strengthened my expertise in modern layout structuring.
